CALCULUS (MATH)

0220 Analytic Geometry and Calculus I

This is the first course in the basic calculus sequence and is intended for all mathematics, engineering, science, and statistics students.   Math 0220 covers the derivative and integral of functions of a single variable. A lab component in which students apply numeric, algebraic, and graphing technologies to calculus problems is an integral part of the course. A scientific calculator is required, preferably a graphing calculator.
