Learning Outcome from the Graduate Program Assessment Matrix: Use the scientific method to generate, analyze, and interpret scientific data relevant to the identification, analysis, and use of therapeutic agents.

- Generate mechanistic hypotheses based on prior evidence
- Derive specific predictions that are hypothesis-driven
- Plan detailed experimental procedures that test specific predictions
- Gather data via experimentation
- Appropriately analyze and interpret data

					H	1үрот	THESI	s G EN	ERAT:	ON							
Generate a relevant biomedical, clinical, public health, or translational research hypothesis.			Х											Х	X		
Defend the clinical and public health implications of a given research hypothesis.						Х								Х	X		
				RE	SEAR	сн Ме	THOD	S AND	STU	DY D E	SIGN	-					
Design appropriate experiments to address generated research questions in the pharmaceutical sciences.		Х	Х				Х							Х	X

Learning Outcome from the Graduate Program Assessment Matrix: Communicate scientific facts, research results and ideas in a clear and compelling way in both oral and written form.

- Write a scientific paper of sufficient quality to be published in a nationally recognized peer reviewed journal
- Apply knowledge and understanding of ethical research practices (e.g., ownership of data, authorship, falsification and misrepresentation of data, ethical use of animals in research, use of copyrighted material, plagiarism)
- Prepare a lecture or seminar that has focus and depth, and that presents information in a clear and informative way
- Write a meritorious grant proposal (i.e., one that is hypothesis-driven, scientifically justified, and appropriately analyzed and interpreted)

							G	RANTS	SMANS	SHIP												
Defend a written research proposal describing specific aims, significance, innovation, and approach.				X													Х	X		Х		
	PREPARATION AND DELIVERY OF ORAL AND WRITTEN SCIENTIFIC INFORMATION																					
Develop presentations describing proposed research, research in progress, or research findings.						Х	Х			Х							Х	X			х
